Conference Venue: The Splendor Hotel, Taichung, Taiwan (hosted by Chaoyang University of Technology)

Sponsors: Chaoyang University of Technology, Sina Smart Computing Institute, University of Aizu, Iwate Prefectural University, Madanapalle Institute of Technology and Sciences, and Hanyang University.

Scope: Multimedia technologies facilitate the creation of a global information infrastructure for acquiring, storing, and communicating data in different forms. The proliferation of multimedia applications raises challenges such as multimedia security and privacy, big data in multimedia, and intelligence in multimedia processing. This conference, established in Melbourne, Australia in 2005 (paper series Springer), and co-founded by Professor Jeng-Shyang Pan of Kaohsiung University of Applied Science and Technology and Professor Lakhmi C. Jain of the University of South Australia, has since been held in various countries. The 21st International Conference on Intelligent Information Hiding and Multimedia Signal Processing (IIHMSP 2025) provides a forum for researchers, engineers, and scientists to discuss a wide range of topics, including information hiding, multimedia signal processing, the application of artificial intelligence in multimedia and signal processing, and information technology. This diversity ensures that all our attendees will find topics of interest and have the opportunity to exchange the latest research outcomes. Topics of interest include, but are **not limited to**, the following:

Track I: Information Hiding and Security:
